

Joel Staugaitis

Full Stack Software & AI Engineer

07478709717 | 56rolsj@gmail.com | stegi56.com – Portfolio | [LinkedIn](#) | [GitHub](#) | [YouTube](#)

A systems-oriented engineer fuelled by novelty in deep dives into frameworks, methodologies and languages. Takes pride in reducing complexity to bring others onboard across the stack. Experienced in engineering for a 45+ million user platform, providing tech leadership, security automation, DevOps and software in mission-critical environments.

Employment

CGI – Consultant Software Engineer

July 2025 - Present

- **Role:** Delivering to a public sector data platform using aws, Docker, GitLab CI/CD, Python, Java, Terraform and Vault.
- **Encryption, Secret, Alerting, File Transfer Service and Automated Test Management:** Ships features, fixes and updates for systems in response to client reports and needs. Also provides onboarding support.
- **SEV-1 Recovery:** Took initiative in recovering a critical service, while analysing, sharing architecture and debugging thought process, yielding maximal benefit from having all hands on deck and a graceful recovery without data loss.
- **Security:** Patched dozens of vulnerabilities and implemented security opinions for prevention at library/module levels.
- **Redesigned Onboarding Methodology:** Recognised a previous method was manual and labour heavy on maintainers, implemented an easier self-service path. Quadrupling adoption over 2 months.
- **Mentoring and Knowledge Sharing:** Frequently deep-dives, documents, simplifies and presents to other platform engineers on mappings of how legacy systems work to make them accessible to everyone.
- **Platform Consultation:** Delivers analysis to steer platform engineering opinions, plans and decisions.

He Is Real – Volunteer Software Engineer

May 2025 – July 2025

- **Role:** Architected and deployed a POC for a testimony site. Allowing public upload, view of stories and admin moderation.
 - **AI accelerated Full Stack delivery:** Developed backend, frontend, web-components and workflows efficiently.
 - **DevOps:** Setup CI/CD, deployments, object storage and user management using GCP and AWS.
 - **Client Communication:** Guided the project owner through engineering choices, trade-offs and costs – resulting in on time delivery and the project now growing with 20+ testimonies.

HM Revenue & Customs - Software Developer

October 2023 - August 2024

- **Role:** Developed on team *Platform Operations* on the Multi-Channel Digital Tax Platform (MDTP), responsible for DevOps, paved road, aws, observability, scalability and CI/CD at HMRC. Key contributions include:
 - **R&D:** One resulted in a 100+ microservice reduction across all HMRC environments.
 - **Automation:** Web scraped and coded a config explorer tool to improve team's efficiency.
 - **Micro-service & Frontend Development:** Using Scala and MongoDB, worked on optimisations, improved fall-back mechanisms for microservices and evolved frontend for a self-service Catalogue tool.
 - **DevOps:** Managed infra via Terraform in response to support tickets and automated enforcement of Platform opinions.
 - **Platform Contractor Rotation:** Played a role in preparations and execution of Platform handover.
 - **Knowledge Sharing:** Was an active member of Personal Development Community of Practice (PDCOP).

Education

City, University of London – Computer Science, graduated top of class & 1st Class BSc (Hons)

September 2021 - July 2025

- **Stage 1-3:** Systems Architecture, Operating Systems, Functional Programming, Concurrency, Computer Networks, Cloud Computing, Language Processors, Computer Vision, Java, C++, Haskell, SQL, JavaScript, Python.
- **Placement Year:** HM Revenue & Customs - Software Developer and recipient of employer nominated 'Dean's Award'.

Certifications

- AWS Cloud Practitioner
- Terraform Associate
- Vault Associate
- GitLab CI Fundamentals

Projects

- **ZeroCam:** Embedded dashcam system in Rust with Tauri and REACT for Raspberry Pi, with cloud features such as streaming and cloud backup. Contributed to the Tauri open-source community in the process. ([Repo](#)/[Demo](#)).
- **Face Mask Detector:** Built OpenCV computer vision pipeline to select faces and highlight incorrect usage. ([Repo](#)).
- **ChatEz:** Scalable web chat with Express + React on GCP. Employed APIs for translation + AI summary features. ([Repos](#)/[Demo](#))
- **Regression Body Fat Estimator:** Trained a ML model for body fat estimation using TensorFlow. ([Repo](#) / [Demo](#) / [About](#)).
- **Bob:** Created a platform game “Bob” using a variation of the box2D engine in Java. ([Demo](#)).
- **League of Legends Analytics:** Made a tool that gets match data to provide post-match performance analysis ([Demo](#) / [Docs](#)).

Hobbies and Achievements

- **Computer Building:** Self-taught and built first computer at age of 15. Inspired, and supported friends through 4 builds.
- **Duke of Edinburgh Award:** Silver award.
- **Martial Arts:** Brown belt in Karate.
- **Music:** Grade 5 piano.
- **Air Cadets:** Attained Flight Sergeant rank (2nd highest)
- **Volunteer Sound Engineer:** for 300+ people events for 7yrs
- **Powerlifting:** Training while evolving nutrition and strategy.
